

## Tandem language learning – Useful tips

- Arrange regular meetings
- Practise each language separately
- Dedicate the same amount of time and attention (e.g. one hour) to each language.
- Avoid mixing languages i.e. code-switching
- Alternate in being the teacher and the learner
- Clarify the way you would like to learn (e.g. reading texts, speaking about work or each other's culture, speak while doing things together such as cooking meals...)
- Agree on the way of giving and receiving feedback
- Agree on how to deal with corrections
