

Topic of the month:

## Working on a research vessel

**28 May 2021**

13.00 – 14.30

online via Zoom

Research cruises are an important part of marine sciences. Many PhD students have participated or will participate in such expeditions. But what is it really like to be on a ship 24/7 - working, sleeping, eating, socialising, ...?

In this seminar, GLOMAR members **Nele Behrendt, Aagje Eijsink, Carolin Müller, Katja Stanislowski and Yiting Tseng** will share their experiences of research cruises they participated in.
