

Topic of the month:

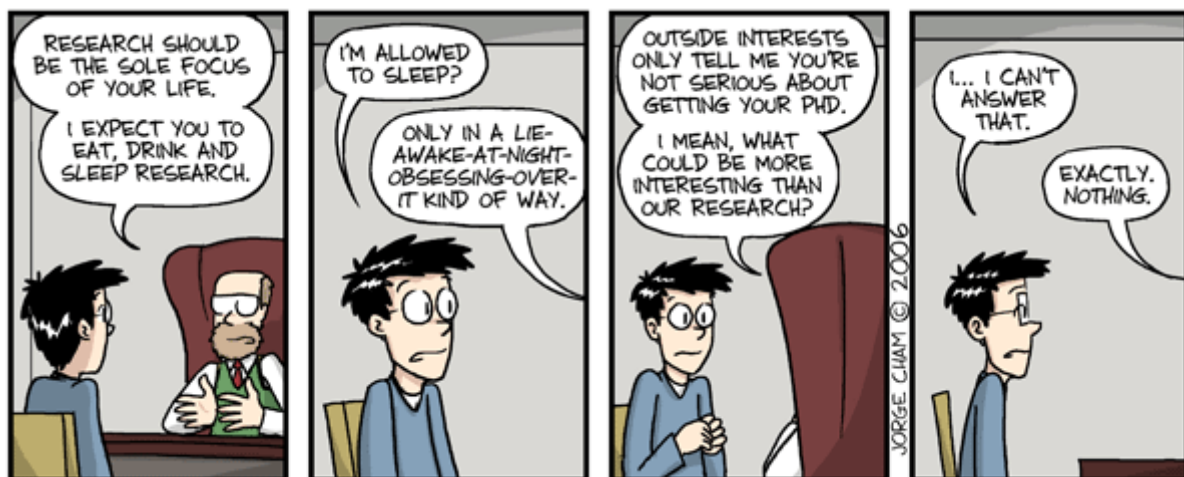

**Engagement of GLOMAR members
in scientific and environmental organisations and projects**

3 May 2021

13.00 – 14.30

online via Zoom

Engagement in scientific or environmental organisations or projects that are not (directly) related to the own PhD project can be a means of building a network, setting sail for future career paths and (also important!) a rewarding distraction from academia. In this seminar, GLOMAR members will introduce organisations and/or projects they are involved in.
