Objectives

This course is part of the joint research training for GLOMAR PhD students from natural and social sciences. It will focus on subject-matters that are prominently addressed by GLOMAR PhD-students research, i.e. the core aspects of societal dimensions of global change in the marine realm.

The course will introduce the

- *political science* and *sociological* perspectives on interactions of societies and the seas,
- *economics* of environmental use and protection,
- *laws* on use and conservation conflicts in the marine environment, and
- *history* of human demands for and impacts on marine resources.

The programme aims at providing an overview of the most relevant concepts and approaches of the participating social science disciplines.
